Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 July 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This Office Action is in response to the amendment filed July 16, 2003 for the above identified patent application.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "gear made entirely of plastic" must be shown or the feature(s) canceled from the claim(s). More clearly, the cross-hatching in Figures 2, 3, 5, 6, 8, and 9 must indicate a plastic material. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 3, and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Amended claim 1 recites "a plurality of blades are formed so as to extend inclinely toward said back surface from said diametrical ribs" (lines 9-10) and "an

end of each blade on said back surface side is located on an extension of a corresponding diametrical rib" (lines 11-12). The limitations are confusing because the first recited limitation appears to define the blades as extending from the diametrical rib located on the front surface and the second recited limitation appears to define the blades extending from the diametrical rib located on the back side surface. It is unclear if the blades contact the ribs on the front or back surface.

Claim Rejections - 35 USC § 102

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 1-6, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Mabuchi et al. (US Patent 4,022,074).

Mabuchi et al. discloses a molded gear having teeth formed around an outer periphery, a hub, a web, radially extending rib portions, and blades, wherein an end of each blade is formed on the extension of a corresponding diametrical rib at a position on a side surface of the gear. The method limitation of forming the gear "by injection molding" has been given little weight in an apparatus claim.

Response to Arguments

6. Applicant's arguments filed July 16, 2003 have been fully considered but they are not persuasive. The prior art to Mabuchi et al., as applied to the arguments, clearly illustrates each and every limitation of the claims, including the limitations defining the gear being formed entirely of plastic and the end of the blade on the side surface of the gear is located on an extension of a corresponding rib that is formed on the surface side and extends towards the back side of the gear.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the cooling blades illustrated by Chertoff ('733) and Freier, Jr. ('684).

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
